github.com/AKASH-1AK

An Artificial Intelligence and Machine Learning Engineering student with entry-level experience in Machine Learning, Data Science and Cloud Technology. Eager and adept at collaborating with diverse teams to develop creative technical solutions for complex Realtime-problems to create impactful Tech solutions and experiences.

INTERNSHIPS

Tamil Technology Research Center - Bannari Amman institute of Technology

May-2022

- May 2022 - Present As a Machine Learning intern at the Tamil Technology Research Center, I am currently working on an AI Based Tamil Music Synthesis Using Machine Learning, Deep Learning, Audio signal processing libraries and models to synthesis a song based Tamil music Grammar used in Olden era.
- My role is to research in Tamil Grammars and suitable model and learnt the needed technologies to develop the product.
- Contributed to the development of an AI-based Tamil music synthesis project, employing deep learning and audio signal processing techniques to recreate music aligned with ancient Tamil grammar, successfully enhancing cultural preservation research efforts and Sentiments of Tamil Poets

Pinnacle Labs

Kolkata, india[remote]
2024 - 1 Month

- Built ML & NLP solutions like Resume Parser, Translator App, Autocorrect Tool, and Teachable Machine.
- Developed classification, regression, and clustering models for real-world use cases.
- Key projects: Breast Cancer Prediction, Customer Segmentation, Credit Card Fraud Detection, Fake News Prediction, Car Price & CGPA Prediction.
- Worked with Python, Scikit-learn, NLP, and Feature Engineering.

SKILLS & PROFICIENCIES

- **Programming Languages**
 - C | (Intermediate)
 - Python | (Intermediate)
 - SQL | (Intermediate)
- **Machine Learning**
 - Supervised Learning, Unsupervised Learning
 - Pandas, Numpy, Matplotlib, Seaborn
 - NLP (Tokenization, Sentiment Analysis)
 - Streamlit
- **ML-ops & Devops**
 - **Big Data & ML Ops:** Apache Airflow - (Beginner)
 - **Cloud Platforms:** Google Cloud, AWS - (Beginner)
 - **Version Control:** Git, GitHub,
 - **Deployment:** Docker
- **Data Engineering**
 - ETL (Airflow)
 - MongoDB
 - PostgreSQL & Workbench
- **Soft Skills**
 - Event Management, Project Leadership
 - Collaboration, Communication

CERTIFICATIONS

- Google Cloud Engineering Certificate
Issued by Google Cloud (by completing Learning path)
- AWS - Cloud Practitioner (CLF-02)
Issued by Amazon Web Service (by completing CLF-02 Exam)
- Github - Foundations
Issued by Github (by completing Github Foundation Exam)

PROJECTS

SENTIMENT ANALYSIS FOR TAMIL LYRICS

2024(Jan - May) - [Link](#)

An **NLP** based emotion extraction from **Tamil songs** or (**Sangam literature**)Texts and identifying its emotion based on the rules provided in Ancient literature. My role is to training data and annotating it based on their particular rules. we can predict the emotions that behind in un composed Songs or Lyrics. By this we can identify the emotion and suggest the song recommendation and song narration using emotions.

Corpus Creation for Tamil Text

2025(In-progress)

Built a Pipeline for Creating a **Data corpus** which is most needed one for preserving Tamil using **NLP** Technique and **ETL(Extract,Transfer,Load)** Data Engineering Pipeline in the base of Apache Airflow. The project performs the **Web scraping** from Tamil News paper and Transfer to our needed format and load it into our **PostgreSQL** or also can save it in CSV or needed format . Its basically a Research oriented project and still we are adding some more unique concepts in NLP for Tamil .

MERN -Stack Containerization

(2025 - Jan) - [Link](#)

Containerized a full-stack MERN application for a data entry portal using **Docker and Docker Compose**, enabling isolated, reproducible development and deployment environments. Integrated **MongoDB** as a service and configured multi-container communication using custom **Docker networks**, reducing environment setup time by 80%.

AWS Full-Stack Deployment – Task Manager

App(2025 - May) - [Link](#)

Built and deployed a task manager web application using AWS services. Set up **EC2** for running the Flask backend, **RDS (MySQL)** for database storage, and **S3 with CloudFront** for hosting the frontend. Managed VPC, subnets, security groups, and **SSH access**. Configured environment using virtualenv and connected the app securely to the RDS instance.

 Blog: [From Code to Cloud](#)

EDUCATION

- **B.Tech Artificial Intelligence and Machine Learning** - Bannari Amman Institute Of Technology Sathyamangalam. 7.08 CGPA [Pursuing] 2022-2026
- **SSLC & HSC** - Victory Matric hr. Sec school Mylode,KanniyaKumari. Above 70% in both SSLC & HSC

ACHIEVEMENTS

- Participated in **Kani Tamil 24**, the International Tamil Computing Conference(2024-Feb)
- Presented our Project in **Startup-TN Thamili**-Hackathon (Madurai Hub) - 2025(March)
- Member at **AWS ETC**(Emerging Talent Community) and Community Builders

HOBBIES

- Cooking
- Playing Instrument (Veenai)
- Singing
- Reading Books & Novels

I AKASH , declare that all the details provided above are true to the best of my knowledge
